FBN offers quality made in the USA

SINCE 1988, FBN HAS MANUFACTURED REPLACEMENT FILLER AND CAPPER PARTS AND PROVIDED service for the food and beverage, pharmaceutical, distillery, automotive, chemical, cosmetic, personal care and the rapidly growing micro-brew industries. Throughout the years, the company has expanded its design and machining capabilities in order to meet the needs of its customers and ensure that it is providing the highest quality parts and service.

FBN strives to build lasting relationships with both customers and vendors, using the philosophy to supply the highest-quality parts and service for the best price. The company designs and manufactures parts for virtually all filling and capping applications including, but not limited to, pressure gravity, bowl, counter-pressure and inline applications. It supplies replacement parts for most equipment manufacturers, such as US Bottlers, Alcoa, Zalkin, Arol, BC, Biner Ellison, Laub Hunt, Taiwanese, KHS, Mejer, Alsim, Fogg, MRM, Filler Specialties, Horix, Ave and Federal, among others. It also specializes in re-engineering and manufacturing

durable, reliable and high-performance parts.

FBN uses multi-spindle, multi-axis computer numerical control (CNC) machines and specializes in stainless steel manufacturing. Although its passion lies in this medium, it works broadly with materials of all types, depending on the project. Its multiple CNC capabilities provide precision and flexibility from one-piece prototyping to high-volume runs. It also works closely with local Michigan shops to supply the end user with 100-percent American-made products.

FBN Sales Inc., 28 Industrial Parkway, Plainwell, Mich. 49080; 269/685-0100; fbnsalesinc.com. **BI**
