

Celebrating **30 Years**

Bottling Replacement Parts

BUILT BETTER THAN WHAT'S BUILT IN

Parts and Service Support for all Leading OEM Fillers and Cappers

Filling Valves

We design and manufacture **filling valves** for virtually all filling applications including, but not limited to: **pressure gravity, bowl, counter pressure and inline applications**. We supply replacement parts for most equipment manufacturers such as: US Bottlers, BC, Biner Ellison, Laub Hunt, Taiwanese, KHS, Mejer, Alsim, Fogg, MRM, Filler Specialties, Horix, Ave and Federal to name a few. We specialize in re-engineering and manufacturing durable, reliable and high performance parts.

Gripper Assemblies

FBN manufactures complete replacement **gripper assemblies** for US Bottlers, Zalkin, Arol, Alcoa, Fogg, and Filler Specialties among others. We use a variety of innovative material choices and design features to handle virtually any application.

Cap Chucks

All **cap chucks** are designed and machined in-house allowing unlimited customization and material options to meet any need. We manufacture **replacement chucks** for all major OEM's. Some examples are: Arol, Alcoa, Zalkin, Fogg, US Bottlers and Filler Specialties. We supply chucks directly to major cap manufacturers testing equipment during the R&D process as well as the end user for production. In many situations we are able to provide completed chucks in less than one week.

Filler Parts

To compliment the **filling valves** and **capping parts**, we also manufacture **guide rods, support rods, cam rollers, bolts, bushings, clips, weights, main filler rings, full manifold systems, gears, rotary unions** and many other machinery components. We keep thousands of parts on the shelf for ultra-quick delivery and our flexibility, accessibility, and diversity allows us to respond to your emergencies immediately.

Magnetic Headsets

FBN is part of the exclusive distribution and sales network for **magnetic headsets** manufactured by Magnetic Technologies in Oxford, MA. We offer a direct replacement for Arol, Alcoa, Zalkin, US Bottlers, FOGG, KHS, Krones and Acma Corniani cappers in a **hysteresis design** which provides a smooth torque, non-ratcheting application. Magnetic Technologies Ltd. has been providing quality hysteresis clutches since 1984. With tens of thousands of units in operation, their unique design provides for lower inertia during application and totally encapsulated magnets to work in the harshest environment. Headset exchange programs are available upon request. The Magnetic Technologies engineering and support staff is available to design custom headsets to handle your unique needs.

Services

Installation/Training/Support: We have qualified field technicians available for installation of machines and changeover parts. At FBN, our service and support is second to none. We provide all-encompassing training and support for every part we manufacture.

Line Audits: FBN has the ability to analyze filling systems and recommend improvements throughout the entire filling process. Our staff has an unmatched understanding of filling dynamics and process systems.

Preventative Maintenance Plans: We understand how critical it is to keep your lines running efficiently. In addition to our development of fully integrated PM plans, we have an experienced staff trained to service all your maintenance needs.

Solutions: We are in the business of providing solutions. Many of the parts in our catalog were hatched from challenges our customers were having with existing designs and quality. We have decades of experience for all your consulting needs.

About Us

Since 1988, **FBN has manufactured replacement parts and provided service for the food and beverage, pharmaceutical, distillery, automotive, chemical, cosmetic, personal care and the rapidly growing micro-brew industry.** Over the years, we have expanded our design and machining capabilities in order to meet the needs of our customers and to ensure we are providing the highest quality parts and service.

At FBN we strive to build lasting relationships with both customers and vendors. It has been our philosophy since day one to supply the highest quality parts and service for the best price. Our commitment to building lasting relationships with each and every customer is the most important part of our business and is the core of our unofficial company motto: "Customers are the only people who send us checks!"

As our founder, Jim Turley, has said, *"I knew before I started this business, if I could employ a group of talented, hard-working individuals, driven by the same core values that I found so important not only to success in business, but in life, it would be a recipe for success no matter what we did."*
